

Final 2014 SCY Top 10 listings on USMS web site

By Hans van Meeteren

The final 2014 SCY results are available on the USMS web site. Using the standard masters point score of 11, 9 through 1 for age groups 18-24 through 90-94 a total of 14,112 points is available for men as well as for women. This number may actually be a little bit lower because in the higher age groups not all events are "filled up" with 10 swimmers.

How are we doing as NC? NC men accumulated 336 points and NC women accumulated 541 points. Considering a NC membership of roughly 1500 swimmers, which is roughly 4% of the total USMS membership, we accumulated $100 \times (336+541) / (2 \times 14112) = 3.01\%$ of the total possible number of points. Although no membership breakdown for men and women is available to me, it seems that the women did considerably better than the men. They may even be close to the national average.
